

SUMMARY

As a level designer, I shape spaces through iteration and detail. I build encounters and traversal flows that feel coherent, weighted, and continuous. My process balances intuition with testing, refining layouts and beats until the experience communicates clearly and sustains play.

SKILLS

Design: Modular Design, Whiteboxing, Encounter Design, Combat Flow, Playtesting, Spatial Composition, Environmental Storytelling
Technical: Unreal Engine, Hammer Editor, Unity, Blueprints, C#, Autodesk Maya, Miro, Perforce, Jira

COLLEGIATE PROJECTS

Level Designer

September 2024 – December 2024

Remanence | action-adventure, first-person melee combat, 21-person team

Unreal Engine 5.2

- Designed and whiteboxed modular combat arenas and POIs that defined traversal rhythm and encounter pacing.
- Iterated whitebox layouts with the team to strengthen spatial composition, flow readability, and combat clarity.
- Scripted transitions and triggers in Blueprints to maintain continuous level traversal and narrative flow.
- Composed environmental cues through lighting and prop placement to guide navigation and reinforce story atmosphere.

Multiplayer Level Designer

September 2024 – December 2024

CS2 Map | competitive 5v5 fps, museum setting, independent project

Source 2 Hammer Editor

- Built a competitive map balancing routes, cover, elevation, and flow for tactical gameplay.
- Created top-down layouts and documentation to iterate on timing, sightlines, and engagement paths.
- Developed architectural theming and applied set dressing to reinforce visual cohesion while preserving tactical clarity.
- Led iterative playtests to tune pacing, encounter rhythm, and overall match flow.

Puzzle Designer

April 2023

Portal 2 Levels | momentum-based, puzzle design, independent project

Portal 2 Puzzle Maker

- Designed a five-level puzzle series emphasizing momentum, timing, and vertical traversal to create dynamic spatial flow.
- Built progression through layered mechanics, using sightlines and visual cues to make player navigation intuitive.
- Iterated on timing, portal placement, and spatial layout based on playtest feedback to maintain fairness and clarity.
- Balanced difficulty across the sequence to maintain consistent engagement and a satisfying sense of mastery.

PROFESSIONAL EXPERIENCE

UI Design Intern, Rogue Rooster

May 2025 – September 2025

Alice in Space | third-person, PvPvE, battle royale, extraction, space sim

Unreal Engine 5.6

- Implemented modular UI systems with C++ and Blueprints, prioritizing scalability, performance, and runtime precision.
- Produced a full UX flow in Figma and iteratively developed wireframes to guide diegetic interface design.
- Designed tutorial flow anchored to underlying level composition, streamlining placement for level designers.
- Created UI materials, custom icons and animated visual states to support clarity and readability.

Game Guide, Conundroom Escape Rooms

April 2022 – June 2025

- Created detailed top-down maps and documentation outlining puzzle flow and spatial pacing for each room.
- Facilitated live player runs and iterated puzzle pacing and clarity based on observed player behavior.
- Maintained a 5-star rating across 100+ public reviews through consistent player experience quality.

Art Studio Guide, Art Chaos

September 2022 – April 2023

- Led visitors through experimental spin-art sessions by showing techniques and tailoring feedback to each participant.
- Maintained safe, organized studio operations while ensuring smooth customer flow and positive participant experience.
- Upheld a 5-star rating across 50+ public reviews highlighting clarity of guidance and session quality.

ACHIEVEMENTS & AWARDS

Best Presentation Winner, Map Masters: DigiPen x PUBG MOBILE

2025

- Designed a vertical map emphasizing balance, realism, and accessible navigation for mobile play.
- Integrated environmental assets and gameplay elements to unify visual coherence with tactical readability.
- Balanced weapon tiers, spawn logic, and round pacing using in-editor tools to refine combat rhythm and fairness.
- Awarded Best Presentation by Tencent designers for clarity, completeness, and creative execution.

Platinum Winner, GDC’s Game Narrative Review Competition

2024

Gold Winner, GDC’s Game Narrative Review Competition

2023

EDUCATION

DigiPen Institute of Technology

September 2021 – April 2025

Bachelor of Arts in Game Design, Minor in Art | GPA: 3.6
