

SUMMARY

As a game designer, I work through intuition and precision. I build systems, spaces, and interfaces that feel coherent and alive, refining them until the design holds together. I care about clarity, weight, and purpose, and stay with the work until it feels right.

SKILLS

Design: Level Design, UI/UX Design, Encounter Design, Prototyping, Scripting, Playtesting, Spatial Flow

Technical: Unity, C#, Unreal Engine, Blueprints, Hammer Editor, Figma, Miro, Autodesk Maya, Perforce, Jira

PROFESSIONAL EXPERIENCE

UI Design Intern, Rogue Rooster

May 2025 – September 2025

Alice in Space | third-person, PvPvE, battle royale, extraction, space sim

Unreal Engine 5.6

- Implemented modular UI systems in C++ and Blueprints, prioritizing scalability and runtime precision.
- Created a full UX flow in Figma, iteratively developing wireframes for diegetic interface layouts.
- Designed UI materials, custom icons and animated visual states to support clarity and readability.
- Refined HUD logic and visual organization to reduce cognitive load and improve consistency.

COLLEGIATE PROJECTS

Game Designer

January 2025 – April 2025

Gambler’s Fallacy | isometric roguelike, poker-based combat, 10-person team

Unity 5

- Designed diegetic poker-themed UI reinforcing mechanical and aesthetic coherence.
- Wrote and implemented a tutorial narrative that teaches mechanics through dialogue and player interaction.
- Directed creation of HUD assets and iconography aligned with thematic tone and feedback readability.
- Collaborated across disciplines to refine flow, readability, and onboarding through iterative playtesting.

Game Designer

September 2024 – December 2024

CS2 Map | competitive 5v5 fps, museum setting, independent project

Source 2 Hammer Editor

- Designed a competitive map balancing routes, cover, and elevation to support tactical clarity and fairness.
- Created top-down layouts and documentation to refine timing, sightlines, and engagement flow.
- Developed architectural theming that unified visual cohesion with gameplay readability.
- Iterated through structured playtests to tune pacing, encounter rhythm, and player navigation clarity.

Game Designer

March 2024

Lake Leota | sensory design, independent project

Unity 5

- Designed an interactive experience built around fear, anticipation, and loss of control.
- Implemented dynamic camera behavior, input response, and layered audio to heighten tension and player embodiment.
- Shaped environmental pacing to induce thalassophobia using motion and sensory contrast.
- Iterated through play sessions to refine emotional timing, tactile feedback, and overall sensory cohesion.

Game Designer

September 2023 – December 2024

Remanence | action-adventure, first-person melee combat, 21-person team

Unreal Engine 5.2

- Led level design efforts, creating modular combat arenas that established pacing, spatial rhythm, and narrative flow.
- Directed UI development in Figma to maintain a cohesive visual language and interaction consistency.
- Connected gameplay logic and UI behavior through scripted event systems in Blueprints.
- Conducted playtests to refine combat readability, navigation clarity, and overall player experience.

ADDITIONAL EXPERIENCE

Game Guide, Conundroom Escape Rooms

April 2022 – June 2025

- Guided players through immersive, narrative-driven escape room experiences while ensuring safety and pacing.
- Designed onboarding materials, including maps and walkthroughs, to support team training and operational consistency.
- Delivered responsive, high-quality player support, contributing to 100+ five-star reviews and repeat visitors.

Art Studio Guide, Art Chaos

September 2022 – April 2023

- Facilitated hands-on art experiences tailored to individual comfort and skill.
- Maintained safe, organized studio operations while ensuring smooth customer flow and positive participant experience.
- Contributed to a 5-star guest experience through clarity and personal engagement.

ACHIEVEMENTS & AWARDS

Best Presentation Winner, Map Masters: DigiPen x PUBG MOBILE

2025

Platinum Winner, GDC’s Game Narrative Review Competition

2024

Gold Winner, GDC’s Game Narrative Review Competition

2023

EDUCATION

DigiPen Institute of Technology

September 2021 – April 2025

Bachelor of Arts in Game Design, Minor in Art | GPA: 3.6
